-

Work Experience

2024

BORNTODEV

Blogger (FrontEnd Developer)

- I participated as a content writer and frontend developer, focusing on blog creation related to React.js and animation using GSAP. This opportunity enhanced my communication skills and deepened my frontend knowledge.
- Tech-Stack : ReactJS, GSAP , Wordpress

JAN – MAR 2025

KMUTT Developer

IT3K Festival (FrontEnd Developer)

- A web-based system built with Next.js for managing sports tournaments at KMUTT. It allows users to view match brackets, schedules, and real-time results, focusing on sports like badminton and ping pong.

JAN 2025

KMUTT IOT Hackathon 2025

FrontEnd Developer

- An IoT-integrated web application that uses YOLO AI for real-time object detection and scanning. The system processes visual data from connected devices and displays detection results through a web interface

APR 2025 – Current

SCB Techub

Quality Essurance & Software Tester

- Using Cypress & Python &Postman for testing API this work make me know a lot about a big tech company Environment and mentality
